About me

I looking for my first job as Android Developer. I would like to dig into android development and find out about all features and it's future. I'm a team player, easily can find a common language with others and reach the necessary level of understanding (I have played football for 10 years and have been the captain, so I can lightly cheer up everyone around me)

Technical Skills

- Kotlin, Coroutines
- Firebase, SQLite, Google Maps, Git
- JavaCore ,JavaCollection
- MVVM, MVP, MVC
- HTML, CSS, JS, phpmyadmin, PHP
- JDBC, JSP, MySQL
- WinApi, openGL
- PhotoShop
- Unity3D
- Python, Qt,

Languages

- **Russian(native)**
- **English(B2)**
- **Chinese(HSK1)**
- **Japanese(N1)**

Projects

- Kawai Ashisutanto – in that project I show my base programming skills at Android Studio. It includes basic CRUD operations with OOP, interacting with RealTimeDatabase(Firebase), working with Google Maps, implementing RecyclerView, using Coroutines, LiveData, I18N and etc.
